Comment

Bharath M.
9/28/2022 3:23 PM

Steps To Reproduce:

Enter a record when natid is invalid (Example: 12, 345, 00)

Expected result:

Record should not be accepted as record is invalid

Actual Result:

Record is getting accepted but not getting reflected when table is refreshed. It is even breaking end point /gettaxrelief when such record is present in data base.
